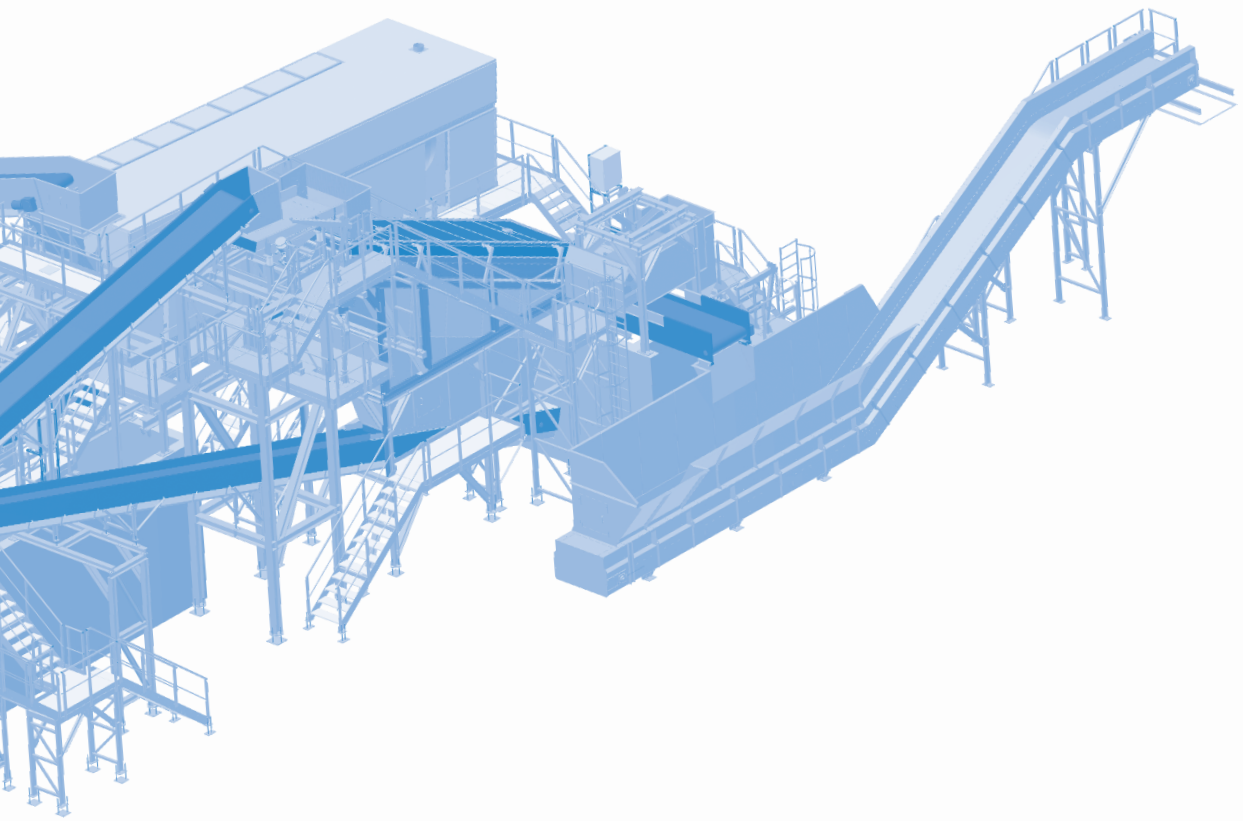
CRYSTAL CLEAR CONCEPTS FOR A CLEANER ENVIRONMENT



WELCOME TO REMA ANLAGENBAU

WHY YOU ARE MAKING A GOOD INVESTMENT WITH OUR PLANTS.

For 25 years together with our customers we have been successfully designing practical, profitable recycling concepts that also keep the environment clean in the future. Since the end of the 90s, after the restructuring of the company, we have been specialising above all in the area of waste management and here in particular in the design, production and erection of sorting and processing plants for various types of waste.

Our designers and technicians plan and implement your entirely individual plant solution with a high degree of specialised knowledge and experience. By observing the current market, and thinking ahead and recognising further development opportunities we ensure that your investment achieves as high a return as possible.

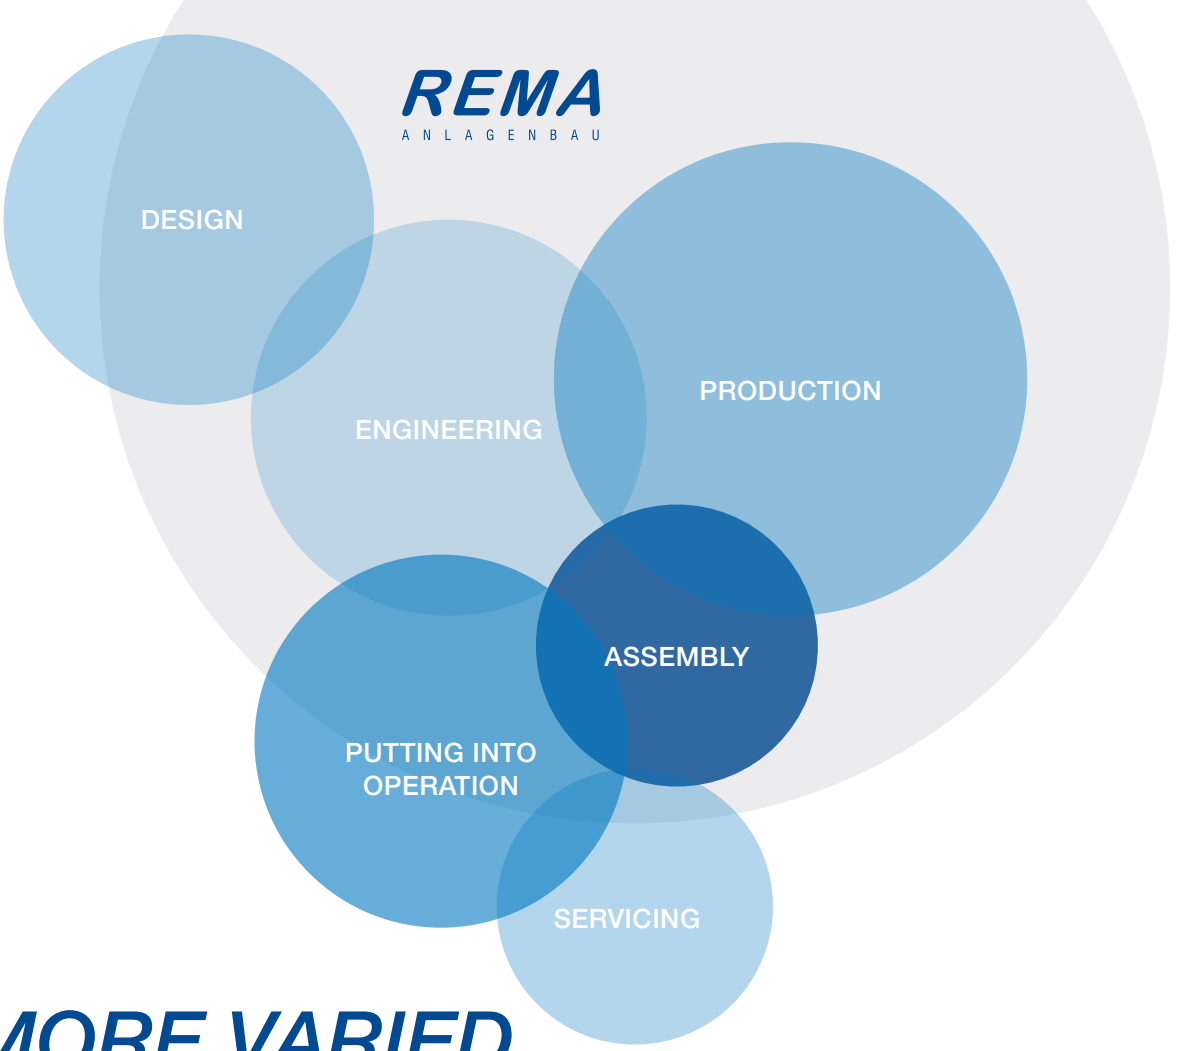
We are looking forward to speaking to you.
Your REMA team

"You will receive the best advice from us if you are looking for individual plant solutions and their implementation."

Dipl. Ing. Bernd Conrad
MANAGEMENT

"Our experience and our specialised knowledge will guarantee the highest possible return on your investment"

Dipl. Ing. Thorsten Levin
MANAGEMENT



THE MORE VARIED YOUR DEMANDS, THE MORE WE HAVE TO OFFER.

WE HAVE PUT A LOT IN SO THAT YOU WILL GET A LOT OUT.

As the conveyor technology has a decisive influence on the reliability and cost effectiveness of the whole plant, we particularly specialise in these plant components. On this basis, we offer particularly high-quality and robust conveyor units such as belt conveyors, chain belt conveyors or particularly high load capacity rack conveyors. Using our experience in this area, all units have design details that guarantee a long service life, insensitivity to interference as well as high ease of maintenance and thus optimum performance.

CERTIFICATE

REMA

ISO 9001:2015

REMA Anlagenbau GmbH

CERTIFICATE

ISO 9001 & DIN 18800 CERTIFIED

“Process-oriented quality management ensures that our products meet national and international requirements.”

PRODUCTS - WELL SORTED.

SORTING AND PROCESSING PLANTS ESPECIALLY FOR YOUR REQUIREMENTS – A CONVEYOR BELT OF ADVANTAGES.

- high throughput rate
- high-quality substitute fuel generation
- high degree of purity
- high sorting depth
- cheap
- high value creation
- profitable
- reduction of residues
- with high reliability and flexibility

SATISFIED CUSTOMERS ARE OUR BEST REFERENCE.

IF YOU ASK FOR MUCH, YOU CAN EXPECT MUCH

REMA offers comprehensive solution and implementation skills for all types of plants - starting from complete sorting plants right to individual system components for the most varied application areas. Furthermore our partners and customers appreciate the intensive consultation - from the application to the development of customer-specific solutions - and naturally the wide experience of REMA in the planning, production and servicing of the plants.

"Both in the planning as well as in the implementation and servicing I can thoroughly recommend REMA."

Philippe Bal
GROUPE NICOLLIN

"What was important for us was a partner who was also available for servicing tasks after putting it into operation."

Harald Höpperger
HÖPPERGER GMBH & CO.KG

"Surely the best choice when you are looking for flexible solutions in matters of conveyor technology."

Christian Baumann
HEIN DÉCHETS S.À.R.L.

"From the design to the completed plant, everything from one source, just REMA."

Dipl.-Ing. Edgar Hösler
VEOLIA UMWELTSERVICE GMBH & CO.KG

"Cost transparency, honesty and innovative solutions are values that are a matter of course for REMA."

Jens Göhner
GWA GRAMBEKER WERTSTOFF AUFBEREITUNG GMBH & CO.KG

„Through cooperation with REMA we benefit not only from their problem-solving skills but also from an excellent service."

Olaf Hartig
